37 CFR §1.56(a) and (b)
DUTY TO DISCLOSE INFORMATION MATERIAL
TO PATENTABILITY

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is cancelled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
- (2) It refutes, or is inconsistent with, a position the applicant takes in:
 - (i) Opposing an argument of unpatentability relied on by the Office, or
 - (ii) Asserting an argument of a patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.*

*Note, 37 CFR §1.97(h) states: "The filing of an information disclosure statement shall not be construed to be an admission that the information cited in the statement is, or is considered to be, material to patentability as defined in §1.56(b)."

Dear Sir:

I, David Allen, an officer authorized to act on behalf of The Regents of the University of Colorado, which is the assignee of the entire right, title and interest in the above-identified application, hereby state that the filing date of the above-identified application was necessary to preserve the rights of the parties in the above-identified application and to prevent irreparable damage to the parties.

This application claims priority under 35 U.S.C. § 120 as a continuation-in-part from U.S. Patent Application Serial No. 09/978,982, which issued as U.S. Patent No. 6,667,041 on December 23, 2003, which claims priority under 35 U.S.C. § 120 as a continuation of U.S. Patent Application Serial No. 09/463,040, filed January 17, 2000, which issued as U.S. Patent No. 6,365,164. Denial of the filing date for the present application (U.S. Patent Application Serial No. 10/655,889) would result in a loss of rights to the September 4, 2003 filing date for the claims of this continuation-in-part application.

The Regents of the University of Colorado, is the assignee of the entire right, title and interest in the patent application identified, which claims the benefit of priority under 35 U.S.C. § 120 to U.S. Patent Application Serial No. 09/978,982 and U.S. Patent Application Serial No. 09/463,040. The assignment is by virtue of: (1) an assignment from the inventor of U.S. Patent Application Serial No. 09/463,040 and all continuation, divisional, continuation-in-part and reissue applications thereof to University Technology Corporation, recorded in the U.S. Patent Office on September 25, 2000, at Reel 010137, Frame 0410; and (2) an assignment from University Technology Corporation of U.S. Patent Application Serial No. 09/978,982 and U.S. Patent Application Serial No. 09/463,040, and any continuations, divisions, continuations-in-part, reissues and extensions thereof, to The Regents of the University of Colorado, recorded in the Patent and Trademark Office on February 3, 2003, at Reel 010137, Frame 0410. Copies of the above-identified Assignments are attached hereto.

The undersigned (whose title is supplied below) is empowered to act on behalf of the assignee.

I hereby declare that all statements made herein of my own knowledge are true, and that all statements made on information and belief are believed to be true; and further, that these statements are made with the knowledge that willful false statements, and the like so made, are punishable by fine or imprisonment, or both, under Section 1001, Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the application or any patent issuing thereon.
